## Product to deter Kangaroo & Wallaby

Protect your land from intruding Kangaroos & Wallabies

### Penergetic b KV as a solution to deter Kangaroo & Wallaby:

A unique Swiss-made product taking advantage of biostimulation with the Penergetic technology. It discourages unwanted animals from entering where the product has been applied.

- Helps protect and prevent damage to crops, vegetation, and forestry plantations
- Non toxic/odorless for humans, animals and the environment
- Promotes a pest free environment in treated areas
- Negates fencing requirement – no capital cost
- Helps limit (potential) spread of wildlife-borne disease
- Programmed approach to minimize damage and control populations
- Cost saving alternative to other expensive, inefficient products and methods
- Effective after precipitation

...for intelligent agriculture

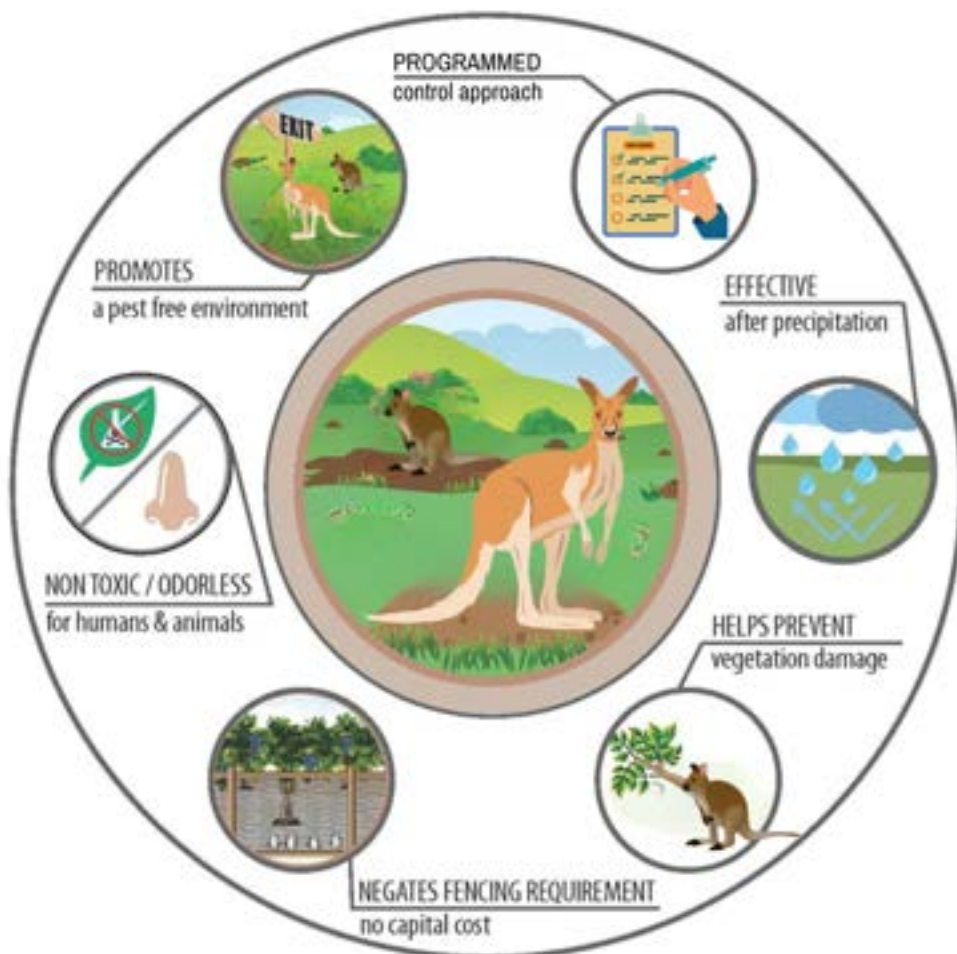

### Application:

- Wettable powder, spray application – onto soil, no-till residue or crop.
- Can be mixed with, and applied at the same time as, other spray agents (or liquid fertilizer).
- Dosage is variable depending on wildlife pressure and other environmental factors.
- **A site pre-assessment is required prior to final dosage and application recommendation.**

### Packaging/Product:

Carrier Material – Sikron. Available in 2 kg bucket, 8 kg bucket or bag, 20 kg bag (dry)
